

Karyotype: 46,XX,der(20)t(14;20)(q24;q13.3)

These images show the unbalanced product of an autosomal reciprocal translocation between chromosomes 14 and 20 with trisomy for part of chromosome 14 (q24 to the telomere) and monosomy for part of chromosome 20 (q13.3 to the telomere)

**FISH studies with
whole chromosome paints**

Chromosome 20 paint - red
Chromosome 14 paint - green
